

Client information request

Website and reservation project checklist

Information and materials required from the lodge before design and development begin

STATUS	PREPARED FOR	DATE
For client review	Hotel or lodge management	5 September 2026

How to complete this checklist

Please complete the fields that apply and attach the requested files. If an item has not yet been decided, write 'to be confirmed' and name the person who will make the decision. Original photos and logos should be supplied as separate files rather than pasted into this document.

Responsibility guide

Management should assign one person to coordinate the client's response. That person does not need to prepare every item, but must make sure each responsible manager supplies and approves the correct information.

Checklist area	Responsible person from the client	Project Coordinator's role
Business identity and authority	Owner, Director or General Manager	Check completeness and place the information into the project and application records.
Business profile, brand and website content	General Manager or Marketing representative	Organise supplied material and identify gaps. Management approves all public claims and images.
Rooms, rates and reservation rules	General Manager with Front Office Manager	Document the agreed rules for the booking system. Management makes all commercial decisions.
Banking, deposits and refunds	Owner, Director or Finance Manager	Prepare and lodge gateway material. The client supplies account records, signs bank forms and pays bank charges.
Front desk procedures and alerts	Front Office Manager	Translate the approved procedure into system requirements and training material.
Domain and ownership accounts	Owner, Director or authorised manager	Prepare and lodge the .com.pg application. The client signs the declaration, supplies registration details and pays registry fees.
Technical configuration	Developer, with management approval	Coordinate technical details and submission follow-up.
