

Payment gateway preparation

Kina Bank and BSP merchant requirements

Application and technical readiness checklist for the lodge's online reservation payments

STATUS	PREPARED FOR	DATE
For bank confirmation	Hotel or lodge management	5 September 2026

1 Purpose

This checklist prepares the lodge for discussions with Kina Bank and BSP. It separates requirements published by the banks from supporting material that businesses commonly need during merchant review and technical integration. The bank's current application form, approval decision, contract, fees and integration pack will control the final requirements.

2 Responsibility and limits of service

The Project Coordinator will obtain or prepare the application form, compile the material supplied by the client, lodge the application and follow up with the selected bank. Lodge management must supply genuine and current documents, approve the selected account and commercial terms, sign every declaration, pay all bank charges and answer due diligence questions. The developer will supply the website and integration details. The bank alone decides whether to approve the merchant, what fees apply and when production credentials may be issued.

Requirement	Responsible party	What must be completed
Business registration and ownership records	Lodge management	Provide current IPA and other records requested by the bank.
Identity and signing authority	Owner, Director or authorised signatory	Provide identification and authority documents; sign the application, offer and merchant terms.
Settlement account and bank relationship	Lodge management and Finance Manager	Open or nominate the account, confirm account details and accept settlement conditions.
Application preparation and lodging	Project Coordinator	Complete the application from client supplied information, arrange attachments, submit and follow up.
Website, policies and technical details	Developer, with management approval	Provide URL, hosting, SSL and integration details. Management approves refund, cancellation, privacy and customer service policies.
Fees and transaction charges	Lodge management	Review and accept the bank's written quotation and pay all charges when due.
Assessment and production approval	Kina Bank or BSP	Perform due diligence, request further information, approve or decline, and issue test or production access.
Testing and launch	Developer and Project Coordinator	Complete the bank's test cases and launch only after bank approval. Management completes acceptance testing.

3 Information to prepare for either bank

- ☐ Registered company or business name and registration number.
- ☐ Business structure and industry classification as hotel or accommodation.
- ☐ Postal address, principal place of business and main contact details.
- ☐ Authorised signatories and proof that they may bind the business.

- ☐ Nominated settlement account name, number, BSB and branch.
- ☐ Expected monthly transaction count, monthly value, average booking value and highest expected booking value.
- ☐ Website address, hosting arrangement, content management system and technical contact.
- ☐ Description of rooms and services sold, deposit policy, cancellation terms, refund process and customer support contacts.
- ☐ Proof of identity and business records requested by the bank for customer due diligence.
- ☐ Developer contact for the test environment, payment callback and production launch.

4 Kina Bank Internet Payment Gateway

Kina Bank states that an applicant must be a new or existing Kina Bank SME, Business or Corporate customer. The business completes a Payment Portal application form at a branch. The branch verifies the form and forwards it to the Digital Hub. Credentials and completion advice are issued after processing.

Published step or requirement	Action for the lodge
Hold or open an eligible Kina Bank business relationship	Confirm the settlement account and customer category with the branch.
Complete the Payment Portal application form	Obtain the latest form from a Kina Bank branch and complete all required fields.
Branch verification	Bring the requested identity, authority and business documents.
Digital Hub processing	Nominate an email address that the lodge monitors and protect the credentials when issued.
Branch confirms readiness	Do not launch payments until the bank confirms production access and the developer completes live testing.

KINA BANK QUESTIONS TO ASK

- ☐ Which cards, PNG bank cards and currencies are supported for this merchant category?
- ☐ What setup, transaction, monthly, refund and chargeback fees apply?
- ☐ What settlement timing and reporting files are provided?
- ☐ Does the integration use a bank hosted payment page, API, redirect, plugin or another method?
- ☐ How are successful payments, failed payments, reversals and duplicate callbacks signed and verified?
- ☐ Are partial payments, deposits, later balance payments and refunds supported?
- ☐ What test credentials, implementation guide and production approval checks will be supplied?
- ☐ Which website policies and security controls must be visible before approval?

5 BSP e-Commerce and Internet Payment Gateway

BSP's published Merchant Service Application Form includes e-Commerce as a preferred service. The form asks for the registered business details, business type, industry, current payment methods, transaction values, website information, SSL certificate, technical contact, currencies, nominated account and authorised declarations.

BSP form section	Information or action
Merchant details	Registered company or business name and number; postal and physical addresses; nominated phone and email; contact name, position, telephone, email and mobile.
Business details	Business structure and hotel or accommodation industry selection.
Payment methods	How the lodge receives payments and pays expenses, with monthly and annual values.
Nominated account	Account name, BSB or branch code, account number and preferred service.
e-Commerce	Website URL, hosting company, website content management system, SSL certificate type and validity, IT contact, and requested currencies.
Declaration	Authorised principal signatories, date and common seal where appropriate. The declaration accepts the merchant terms and permits BSP and service providers to assess the application.
Bank review	BSP may ask for specific additional documents and may approve or decline the application.

BSP WEBSITE READINESS

- ☐ Register the production domain and configure a valid HTTPS certificate.
- ☐ Publish the legal business name, lodge address, phone number and support email.
- ☐ Show room descriptions, prices, taxes and charges before payment.
- ☐ Publish cancellation, refund, privacy and website terms.
- ☐ Provide a booking reference and electronic payment receipt.
- ☐ Use the bank approved checkout method and keep card data outside the lodge system.
- ☐ Prepare the production URL, hosting provider, platform name and IT contact for the application form.

6 Technical integration requirements to confirm with the selected bank

Topic	Required confirmation
Checkout	Hosted page or direct API; supported browsers and mobile behaviour.
Authentication	Merchant ID, keys or certificates; storage and rotation rules.
Payment result	Server callback format, signature verification, retry rules and idempotency.
Amounts	PGK support, decimal format, minimum and maximum payment, deposit and balance payments.
Status	Approved, declined, pending, reversed, voided, refunded and chargeback handling.
Reconciliation	Settlement schedule, bank statement reference, portal reports and downloadable files.
Testing	Sandbox access, approved test cases, certification process and production cutover.
Support	Technical support contact, incident hours, planned maintenance and escalation route.

7 Documents to take to the bank meeting

- ☐ Completed or draft merchant application form.
- ☐ IPA certificate or current business registration record.
- ☐ Tax and regulatory records requested by the bank.
- ☐ Identification for owners, directors or signatories as requested.
- ☐ Board resolution, mandate or other evidence of signing authority where applicable.
- ☐ Recent account details or request to open the required business account.
- ☐ Website architecture and sample booking flow.
- ☐ Deposit, cancellation, refund, privacy and customer complaint policies.
- ☐ Expected payment volumes and values.
- ☐ Developer and business contacts.
