

Wellness Lodge

Domain DNS email and hosting procurement plan

Recommended service arrangement and purchasing checks for wellnesslodge.com.pg

STATUS	PREPARED FOR	DATE
For management review and provider quotation	Hotel or lodge management	5 September 2026

1 Recommended decision

The selected arrangement is to register wellnesslodge.com.pg through PNGUoT, use Google Cloud DNS for the authoritative name servers, use Namecheap Stellar for ten separate email mailboxes, and run the website and reservation platform on Firebase. Namecheap has confirmed that its shared hosting name servers cannot answer authoritatively for the domain before registration and delegation. They will therefore not be entered in the PNGUoT application.

A public zone will first be created in Google Cloud DNS. Google will issue the authoritative name servers needed for the PNGUoT application. After PNGUoT delegates the domain, Firebase website records and Namecheap email records will be added to the Google Cloud DNS zone. Google Cloud DNS will remain authoritative. Namecheap will provide email hosting only.

2 What is being purchased

cPanel is the control panel included with Namecheap Stellar. In this arrangement it will be used to create and manage the ten email accounts. DNS records will not be managed in cPanel because Google Cloud DNS will remain authoritative. The lodge does not need a separate cPanel licence or private server.

Service	Selected use	Provider
Domain registration	Registration and renewal of wellnesslodge.com.pg	PNGUoT
Authoritative DNS	Name servers and records connecting the domain to each service	Google Cloud DNS
Business email	Ten independent staff and departmental inboxes	Namecheap Stellar
Application hosting	Public website, reservation system, administration and front desk app	Firebase and Google Cloud
Source control	Private repository and deployment history	GitHub
Online payments	Card or gateway payment and payment status callbacks	Approved Kina Bank or BSP service

3 How the services work together

Google Cloud DNS will answer internet requests for wellnesslodge.com.pg. Website records will point visitors to Firebase. Mail records will send messages to Namecheap's mail servers. Namecheap's hosting name servers, dns1.namecheaphosting.com and dns2.namecheaphosting.com, will not be assigned to the domain.

Address or function	Destination
wellnesslodge.com.pg	Firebase public website
www.wellnesslodge.com.pg	Firebase public website
frontdesk.wellnesslodge.com.pg	Installable Firebase front desk application
admin.wellnesslodge.com.pg	Restricted administration portal

Address or function	Destination
Email to @wellnesslodge.com.pg	Namecheap cPanel email service through records held in Google Cloud DNS

The website files will not be uploaded to cPanel. Stellar currently permits up to 30 email accounts, which is enough for the ten requested mailboxes. Namecheap's published shared cPanel email limit is 10 GB in total across the account, not 10 GB for each mailbox. Storage allocations and use should be reviewed as the mailboxes begin receiving attachments.

3.1 PAYMENT RECEIPT PROTECTION

Bank transfer receipts will be uploaded through the reservation website and stored against the booking in protected Firebase storage. This is the official submission method. The payments mailbox is a fallback for guests who cannot use the upload page. A full mailbox must not prevent the lodge from receiving payment evidence through the reservation system.

- The upload page will accept approved image and PDF formats within a set size limit.
- The system will acknowledge the upload and place the booking in the front desk payment-review queue.
- Front desk and accounts staff will receive the normal alert and can verify, reject or request another copy.
- The booking remains subject to the approved hold rule until staff confirms that funds reached the lodge bank account.
- The system will record the receipt, booking reference, upload time, review result and staff action.
- Mailbox usage will still be monitored, but email capacity will not control whether a guest can submit a receipt.

4 Ten separate email mailboxes

Each address below is intended to be a separate mailbox with its own sign-in, password and storage allocation. Additional addresses may be created as aliases only after management confirms where they should deliver messages.

Mailbox	Main use	Responsible role
owner@wellnesslodge.com.pg	Owner correspondence and executive notices	Owner
manager@wellnesslodge.com.pg	Daily management and approvals	General Manager
reservations@wellnesslodge.com.pg	Booking enquiries and guest correspondence	Reservations Officer
frontdesk@wellnesslodge.com.pg	Reception and current guest matters	Front Desk Supervisor
accounts@wellnesslodge.com.pg	Invoices, suppliers and reconciliation	Accounts Officer
payments@wellnesslodge.com.pg	Transfer receipts and payment follow-up	Accounts or Payments Officer
events@wellnesslodge.com.pg	Functions, catering and event enquiries	Events Coordinator
restaurant@wellnesslodge.com.pg	Restaurant and cafe enquiries	Restaurant Supervisor
carrental@wellnesslodge.com.pg	Vehicle bookings and customer enquiries	Car Rental Coordinator

Mailbox	Main use	Responsible role
admin@wellnesslodge.com.pg	Domain, hosting and system administration	Project and Systems Administrator

Possible aliases include info@, bookings@, functions@, catering@ and cafe@. An alias is an additional delivery address, not a separate inbox, and should not be counted among the ten required mailboxes.

5 Provider options

Option	Published offer reviewed	Advantages	Points to confirm
Namecheap Stellar	20 GB SSD, cPanel and up to 30 email accounts. Current checkout figure supplied for this review is USD 57.72 per year. Shared cPanel email is limited to 10 GB total under the current policy.	Low cost; sufficient mailbox count; online support.	Used for email only. Confirm add-on-domain validation, current email storage policy, sending limits, renewal price and required mail records.
Datec PNG 10 GB	10 GB domain, email and website hosting. Published brochure lists K250 setup and K200 monthly, excluding GST and optional services.	Local support; familiar with PNGUoT procedures; kina billing.	Exact mailbox count; DNS-only and email price; whether static IP is compulsory; backup, filtering and total annual cost.
Other PNG provider	Quotation required from SysTek, Solitec, Ori Pacific or another established provider.	Local payment and support may be easier.	Confirm genuine cPanel, public authoritative DNS, ten independent inboxes, storage, backups, migration and full renewal cost.

Published prices are comparison figures only and may change. The accepted quotation, currency conversion, GST, setup charges, renewal price and optional security services must be recorded before approval.

6 Approved technical sequence

- ☐ Create a public managed zone for wellnesslodge.com.pg in Google Cloud DNS.
- ☐ Copy the Google-assigned authoritative name servers and test the zone directly.
- ☐ Enter the Google Cloud DNS name servers in the PNGUoT application.
- ☐ After PNGUoT registers and delegates the domain, verify that public DNS queries reach Google Cloud DNS.
- ☐ Connect wellnesslodge.com.pg and its website subdomains to Firebase using the records issued by Firebase.
- ☐ Purchase or activate Namecheap Stellar and add wellnesslodge.com.pg using Namecheap's available ownership-validation procedure.
- ☐ Create the ten cPanel mailboxes and copy Namecheap's MX, SPF, DKIM, DMARC and related mail records into Google Cloud DNS.
- ☐ Test incoming mail, outgoing mail and domain authentication before giving staff access.

7 Mandatory questions before payment

Question for the provider	Required answer	Provider response
Can Stellar accept wellnesslodge.com.pg as an addon domain while Google Cloud DNS remains authoritative?	Yes, with validation method	
Which MX and related records are required when DNS is hosted by Google?	Complete record list	
Does the plan include at least ten independent mailboxes?	Yes	
What is the total email storage and any limit per mailbox?	Written allocation and limits	
Can the mail service operate without changing to Namecheap hosting name servers?	Yes	
What SPF, DKIM and DMARC values must be added to Google Cloud DNS?	Exact values supplied	
Are webmail, IMAP and SMTP protected by TLS?	Yes	
What spam, virus filtering, backup and restore services are included?	Services and retention stated	
What sending limits apply per mailbox and per domain?	Limits stated	
What is the complete first-year and renewal cost including tax and extras?	Itemised quotation	
Can all mail be exported if the lodge changes provider?	Yes, method stated	
What support channels and response times apply?	Written support terms	
Can mailbox storage usage and quotas be monitored in cPanel?	Yes, method stated	

8 Responsibility schedule

Activity	Responsible person	Management input or approval
Obtain and compare hosting quotations	Project and Systems Administrator	Confirm budget and preferred provider
Confirm the ten mailbox names and assigned staff	General Manager	Approve final list and access assignments
Create the pre-delegation DNS zone	Project and Systems Administrator	Approve Google Cloud billing
Prepare and submit PNGUoT application	Project and Systems Administrator	Provide completed business documents, signature and payment

Activity	Responsible person	Management input or approval
Configure Firebase website records	Developer or Systems Administrator	Approve production launch
Add Namecheap email service and mail records	Systems Administrator	Nominate mailbox users
Set mailbox storage, passwords and device access	Systems Administrator with department heads	Staff attend setup and training
Approve invoices and recurring renewals	Owner or authorised finance officer	Pay approved provider charges
Monitor storage, delivery and renewals	Systems Administrator	Department heads report email problems
Monitor receipt uploads and failed submissions	Front Desk Supervisor and Systems Administrator	Accounts reports missing or unreadable evidence

9 Estimated service costs

The figures below are intended for budgeting and provider comparison. They exclude website development, ongoing technical support, bank gateway charges, SMS charges, GST where applicable and foreign card or currency conversion fees. USD amounts should be converted using the card issuer's rate on the payment date.

Service	Initial or published estimate	Frequency	Budget note
PNGUoT com.pg registration	K300	First registration	PNGUoT application form; confirm invoice before payment
PNGUoT com.pg renewal	K100	Biennial	Published renewal amount; subject to registry review
Namecheap Stellar hosting	USD 57.72	Annual	Figure supplied for the current plan review; verify checkout and renewal total
Ten cPanel email mailboxes	USD 0 additional	Included with hosting	Included only if the selected plan retains at least ten independent accounts
Google Cloud DNS	About USD 0.20 plus queries	Monthly	One managed zone; query charges are normally small at lodge traffic levels
Firebase Blaze usage	USD 0 to 25	Monthly planning range	Pay as used; low early traffic may remain within no-cost quotas
Transactional booking email	USD 0 to 15	Monthly planning range	Depends on provider and message volume
GitHub private repository	USD 0	Monthly	GitHub Free is expected to cover the initial repository and workflow

Service	Initial or published estimate	Frequency	Budget note
SSL certificates	USD 0	Ongoing	Firebase includes website SSL; confirm mail certificates with hosting provider
Kina Bank or BSP gateway	To be quoted	Setup, recurring and transaction	Bank approval and merchant pricing required

9.1 FIRST YEAR OPERATING ALLOWANCE

Scenario	First year estimate	What it assumes
Minimum usage	K300 plus about USD 60.12	Domain registration, Stellar and one Google Cloud DNS zone; Firebase and transactional email within no-cost allowances
Normal starting allowance	K300 plus about USD 180.12 to 360.12	Stellar and DNS plus an average USD 10 to 25 per month for Firebase and transactional email
Local Datec alternative	At least K2,650 in year one	K250 setup plus K200 monthly hosting, before static IP, mail protection, GST and other charges

For management budgeting, the normal starting allowance should be used until actual traffic and email volumes are known. The approved Firebase billing alert should be set below the management ceiling and reviewed monthly. A billing alert warns staff; it should not be treated as a guaranteed spending cap.

10 Quotation and approval record

Item	Quoted amount	Billing period	Approved by	Approval date
PNGIoT registration				
Google Cloud DNS				
Namecheap Stellar email hosting				
Ten email mailboxes				
Spam and virus protection				
Setup or migration fee				
Firebase and Google Cloud budget				
Other				

11 Management decision

Decision	Selection or signature
Preferred provider	
Approved plan	
Approved first-year amount	
Approved renewal amount	
Approved by	
Signature and date
